**Innovation comes home.**  
home appliances

The future moving in.

**SIEMENS**

## Siemens is at the forefront of technology, design and creme brulée.

Siemens is the number one brand of built-in appliances in Europe. And we're working hard to become the number one brand of built-in appliances in your home. Every late night we spend, every decision we make is made with you in mind. We want our innovations in technology to inspire you to innovations in cooking. We want our feats of engineering to make feats of culinary skill commonplace. We want our pure style to complement and enhance your own style.

As you look through this 2008 catalog of Siemens home appliances, picture them in your home. Imagine how they'll make you feel. Imagine how they'll make your neighbors feel. Imagine how effortlessly they'll create perfect desserts, get wine glasses brilliantly clean, and launder the most delicate garments in your wardrobe. And remember, we've already imagined it, too.

The future contents of your home.

## The avantGarde® microwave ovens.

No kitchen is complete without a microwave oven. And with the models and versatility Siemens offers, you'll rely on your microwaves for more than just popcorn. And melted butter for the popcorn. Of course.

### Microwave with Sensor Cooking

Can cooking get any easier? Yes. With sensor cooking, the Siemens built-in microwave measures the humidity in the oven and automatically adjusts cooking time, based on your choice of 11 presets. 1200 watts and 10 power levels add versatility.

### Integrated liftDoor™

The Siemens liftDoor™ integrates the look of your Siemens built-in microwave with your Siemens iSlide™ built-in oven and warming drawer. It's a simple, elegant solution. Exactly what you'd expect from us.

### Stainless Steel with Convection Cooking

The Siemens convection microwave oven combines performance with the sleek look of stainless steel. A convection fan circulates hot air to cook more evenly. Nine sensor cooking presets, 1000 watts and 10 power levels take the guesswork out of cooking everything from baked potatoes to leftover Chinese. And the stainless steel trim kit makes clean installations simple.

### Over-the-Range Microwave/Ventilation

This combination microwave/ventilation unit is designed to fit above Siemens xTronic® ranges. It features 1000 watts of cooking power, 10 power levels, multiple presets, a powerful 300 cfm fan and a built-in cooktop light. Go ahead and cook all the seafood you want. Siemens has you covered.
